Let's stop wasting money and energy on this ridiculous lawsuit. The truth is consumers have benefited mightily, as has the entire economy from the hard work and tenacious efforts of Bill Gates. Persecution of such hard work and success is unbelievable to most reasonable people. It is time to put the lawyers out of business....take a look at what they are doing to American business with asbestos lawsuits....no one wins but trial lawyers. No one will win by crushing Microsoft, especially the consumer. Please consider dropping any further action. Sincerely, Pat Saunders (Very satisfied Consumer)
